

Easing Border Construction and Long Arming Tips for Scrap Quilts

Scrap quilts are a wonderful way to use up leftover fabric scraps and create a unique and colorful quilt. However, adding borders to a scrap quilt can be a bit tricky, especially if you want to achieve a smooth and even finish. This article will provide step-by-step instructions on how to easily construct borders for scrap quilts, as well as offer valuable tips for long arming them to achieve a professional-looking finish.

Easing Border Construction

Easing is a technique that allows you to join two pieces of fabric together smoothly and evenly, without any puckering or gathers. This technique is often used when attaching borders to quilts, as it helps to create a seamless transition between the quilt top and the border fabric.

To ease a border, you will need to:

- Cut the border fabric to the desired width. The width of the border will depend on the size of your quilt top and the desired finished size of the quilt.
- Fold the border fabric in half lengthwise, wrong sides together. Press the fold to create a crease.
- Unfold the border fabric and align one raw edge with the raw edge of the quilt top. Pin the border fabric to the quilt top, matching the center of the border fabric with the center of the quilt top.
- Starting at the center, stitch the border fabric to the quilt top using a 1/4-inch seam allowance. Stop stitching about 1 inch from the end of the border fabric.
- Fold the excess border fabric over the end of the quilt top and trim the excess fabric even with the edge of the quilt top. Press the seam.
- Repeat steps 4-6 to attach the remaining border fabrics to the quilt top.

Long Arming Tips

Once the borders have been attached to the quilt top, you can begin long arming the quilt. Long arming is a technique that uses a long arm quilting machine to stitch the quilt top, batting, and backing together. Long arming can be a great way to add intricate designs and patterns to your quilt, and it can also help to stabilize the quilt and prevent it from shifting or puckering.

Here are a few tips for long arming scrap quilts:

- Use a walking foot on your long arm quilting machine. A walking foot helps to evenly feed the quilt top, batting, and backing through the

machine, which can help to prevent puckering and shifting.

- Start quilting in the center of the quilt and work your way out towards the edges. This will help to prevent the quilt from shifting or puckering.
- Use a variety of quilting stitches and patterns to add interest and texture to your quilt. Scrap quilts are a great opportunity to experiment with different quilting techniques, so don't be afraid to get creative!
- Take your time and enjoy the process. Long arming a quilt can be a bit time-consuming, but it's also a great way to relax and be creative.

Easing border construction and long arming are two essential techniques for creating beautiful scrap quilts. By following the tips in this article, you can achieve a smooth and even finish on your scrap quilt, and you can also add intricate designs and patterns to make your quilt truly unique.
