The episode begins with the students on a field trip to a quarry. They are there to learn about rocks and minerals. The quarry is a place where rocks are mined. The students are excited to see the different types of rocks and minerals that are found in the quarry.

The students first meet Rock Man, a geologist who works at the quarry. Rock Man tells the students about the different types of rocks that are found in the quarry. He also tells them about the different minerals that are found in the rocks. The students are amazed to learn about the different types of rocks and minerals that are found in the quarry.

After Rock Man's presentation, the students go on a tour of the quarry. They see the different types of rocks that are mined in the quarry. They also see the different machines that are used to mine the rocks. The students are amazed to see how the rocks are mined.

After the tour, the students go back to the classroom. They talk about what they learned on the field trip. They also talk about the different types of rocks and minerals that they saw. The students are excited to learn more about rocks and minerals.

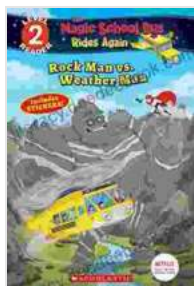

The next day, the students are surprised to see Weather Man in the classroom. Weather Man is a meteorologist who works at the local TV station. Weather Man tells the students about the different types of weather that can occur. He also tells them about the different ways that weather can affect rocks and minerals.

After Weather Man's presentation, the students go outside to do an experiment. They want to see how different types of weather affect rocks and minerals. The students put different types of rocks and minerals in different containers. They then put the containers in different weather conditions. The students are amazed to see how the different types of weather affect the rocks and minerals.

After the experiment, the students go back to the classroom. They talk about what they learned from the experiment. They also talk about the different ways that weather can affect rocks and minerals. The students are excited to learn more about rocks, minerals, and weather.

The Magic School Bus Rides Again is a great show for kids who are interested in science. The show teaches kids about different science topics

in a fun and engaging way. The episode "Rock Man vs. Weather Man" is a great way to teach kids about rocks, minerals, and weather.
