What is the Over Goals Market?

The Over Goals market is a bet on the total number of goals that will be scored in a match. You can bet on the total number of goals to be over or under a certain number, or you can bet on a specific range of goals.

For example, you could bet on the total number of goals in a match to be over 2.5. If the match ends with three or more goals, you would win your bet. If the match ends with two or fewer goals, you would lose your bet.

How to Trade the Over Goals Market

There are a number of different ways to trade the Over Goals market. Some of the most common strategies include:

- **Fading the public:** This involves betting against the majority of the public. The theory is that the public is often wrong, so by betting against them, you can increase your chances of winning.
- **Trading the overreaction:** This involves taking advantage of overreactions in the market. For example, if a team scores a goal early in a match, the market may overreact and price the Over Goals market too high. You can take advantage of this by betting on the Under.
- **Trading the value:** This involves identifying bets that offer value. Value is a measure of the difference between the market price and the true probability of an event occurring. By finding bets that offer value, you can increase your chances of making a profit.

Tips for Trading the Over Goals Market

Here are a few tips to help you trade the Over Goals market successfully:

- **Do your research:** Before you place a bet, take the time to do your research. This includes looking at the teams involved, their recent form, and the head-to-head record.
- **Manage your risk:** Never bet more than you can afford to lose. It is also important to set stop-loss orders to limit your losses.
- **Be patient:** Trading the Over Goals market can be a slow process. It is important to be patient and wait for the right opportunities.

Real-World Examples of Over Goals Trading

Here are a few real-world examples of how to trade the Over Goals market:

- **Example 1:** Manchester City are playing at home against Arsenal. Manchester City are the heavy favorites, so the Over Goals market is priced quite high. However, Arsenal have a good record against Manchester City, so you could argue that there is value in betting on the Under.
- **Example 2:** Bayern Munich are playing at home against Borussia Dortmund. Both teams are in good form, so the Over Goals market is priced fairly evenly. However, Bayern Munich have a slight edge over Borussia Dortmund, so you could argue that there is value in betting on the Over.
- **Example 3:** Liverpool are playing at home against Chelsea. Liverpool have been in poor form lately, while Chelsea have been in good form. The Over Goals market is priced quite low, but you could argue that there is value in betting on the Over. This is because Liverpool are at home and they will be looking to score goals to get back to winning ways.

The Over Goals market on Betfair can be a profitable market to trade, but it is important to understand the market and develop a sound trading strategy. By following the tips in this guide, you can increase your chances of making a profit.
